

Nexus Recycling Management System product summary.

Nexus is an unparalleled application designed to automate the daily routine of processing scale transactions, invoicing customers, and managing employees, shipping containers, selling materials, payroll and more.

Nexus will turn a cluttered scale house into an efficient, organized and near paperless office.

The application was written by AEON Blue Software & Development, a world-class software development company who has developed professional enterprise level software for GM, Lamborghini, Audi, BMW and Ford, as well as other corporations who lead in their industries.

We believe in quality software, at affordable prices, that simply works. No hidden agendas, no hidden fees, no surprises. Our company is founded on strengthening relationships with existing customers and growing together.

Pricing and Equipment:

Nexus is absolutely the lowest-cost software on the market, to implement, install and maintain. We pride ourselves on providing the best customer service and a great product at an unbeatable price.

The software only costs \$9,895.00.

Free installation. Free training. Free updates. Free support. No maintenance fees.

We are the lowest cost, fully compliant software package on the market. Period.

Unless you will be using Nexus on multiple computers, there is nothing else to pay. Everything you need, and everything the software does is included in that cost. The product comes with free lifetime 24-hour support for software issues, and can be updated for free any time online. There is however, a touch-screen application for environments which require them and that software is only \$895.00 to add. There is also a mobile device for yards which are larger or typically have large volumes of people looking to cut down on wait times for their customers which is \$650.

We can come to your location and spend a week on site for an additional \$2,400.00. During this week, we will set up your software, connect and configure cameras, set up cash drawers or payment machines, set up users, import your customers and products, and customize the application. We will also train your staff and ensure you are completely satisfied. Included with this price is one technician and one general software support person who will assist you and your employees in making a smooth transition to Nexus.

Our software works with any printer, any scale, any camera, any scanner, any fingerprint reader, any computer, and is Windows 7 compatible as well.

We do not make money off of equipment, however, we do stock most items and have it readily available for you ensuring you get the best value for your money, as well as hardware that is guaranteed to be problem free. If you feel more comfortable purchasing the equipment yourself, we will absolutely point you in the right direction and make recommendations based on your individual needs.

Program Features:

Nexus has every feature needed in a recycling platform. We will change our application and add features for you to ensure you get exactly what you need. Adding or changing features typically does not cost anything additional for the customer. **Purchases through 2012 receive a free company website with free domain, hosting, e-mail, and automatic pricing published from Nexus to your website every time pricing has changed.**

Some of the highlights to Nexus' operation are as follows:

- **Unlimited data.** There is no limit to the capacity of information that Nexus can hold.
- Simple customer management with account-specific reports that are readily available to you with one click of a button.
- **Special Pricing:** Set up special pricing for customers and when that pricing should expire.
- **Driver management and tracking.** Nexus assigns fingerprints, driver's licenses, pictures, and signatures to a driver or customer.
- **Federal NMVTIS reporting** and vehicle upload with VIN number validation via www.add123.com or using your 3rd party service.
- **State NMVTIS reporting** (Nexus even prints your state's reporting forms and fills in all vehicle information. You just need to sign it and mail it!)
- **Automatic Vehicle Identification** When entering vehicles into the NMVTIS entry portion of the software, simply typing a VIN number will automatically tell you everything about the vehicle, cutting down on data entry time by 30%!
- **California CRV** is fully implemented and compliant in Nexus. California recyclers can use our system to identify, purchase, pay, receipt, track, ship, inventory and report CRV materials. Nexus automatically generates all the proper reports and log sheets, and can build and print a DR6 form instantly!
- **Trash and solid waste collection** is implemented in Nexus to allow recyclers who collect trash from commercial and residential customers to identify, photograph, log and maintain transactions and payments.
- **Nexus supports up to four cameras per computer**, and allows you to set actions to each camera (for instance, take a picture with camera 1 when a driver weighs full, or record a video from camera 3 when an employee pays a scale ticket in cash, etc.)
- **Full scale integration with any scale.**
- Set up **multiple companies** inside of Nexus, each with their own customers, inventory and data.
- **Automated cash drawer support**, keeps employee theft to a minimum. Nexus counts down your cash drawer as transactions happen for end-of-day cash drops and cash counting.
- **Fujitsu Cash Dispenser (ATM) Machine Support** Automate dispensing of cash and even eliminate the payout window, save time and add security to your business.
- **Full inventory system.** Nexus manages your inventory and will even allow you to set automatic inventory adjustments (for instance, if you purchase Cars w/ Tires, you can set Nexus to deduct 33% of whatever is

bought and instead have that 33% go to a waste inventory. If you capture zorba, you can set that waste inventory to deduct 3% and go to a zorba inventory item)

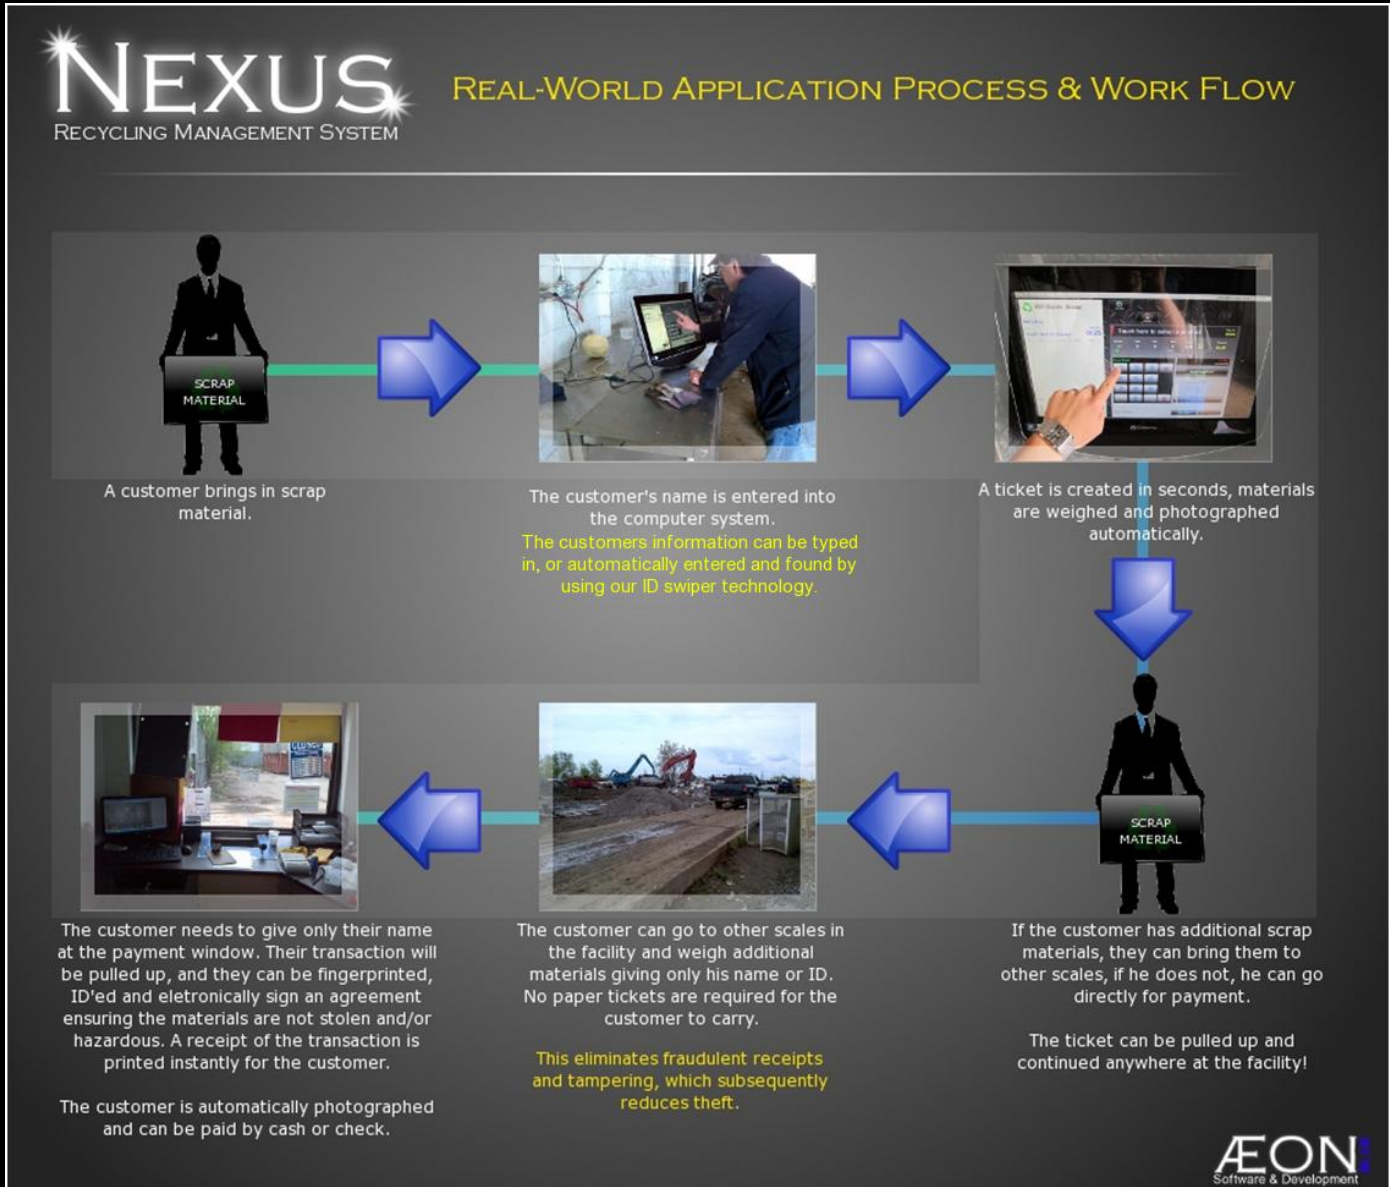

- **The best pricing system on the market** Set up commission points for each product, if you want to make 35% on copper and 50% on steel, Nexus will make sure this happens, it'll automatically adjust what you pay your customers to ensure you hit your target.
- **Security**. You can keep your employees from manual entry of any kind, or from seeing any bank account balances anywhere. There are over 60 different restrictions that can be placed on a Nexus user which prevents employee theft and ensures what is in the system is fully controlled by a manager or owner.
- **Nexus features many reports**, which can be customized as well.
- **Nexus has a full accounts payable system** which allows scale tickets to be paid by check, without any manual user intervention. The accounts payable system is also responsible for paying bills, payroll, miscellaneous checks and more.
- The software has a **full employee time sheet system** built in to keep track of employee hours and overtime.
- Nexus has a **heads-up display** which offers quick-glance information to scale personnel and notifies them of how many tickets are on hold, how many trucks are in the yard, how many employees are clocked in, how many bills are due, how many invoices are waiting for payment, etc.
- Nexus has a **full invoicing system** which allows you to sell products or services to customers, print invoices, and track payments on those invoices.
- There is a full **Product Sales & Container Bookings system** that allows you to sell containers of material and track payments and shipping information on those containers. The Sales & Bookings system prints fully-filled out booking sheets, bills of lading, packing slips, scale tickets and more.
- **Nexus captures fingerprints, signatures, camera images and driver's licenses** and reports to NMVTIS as well as LeadsOnline, making it compliant with every state in America.
- Our software is **fast, reliable, efficient** and can **be used anywhere in the world**. Nexus eliminates the need for the scale house or scale personnel to be on site.
- **Connect all of your locations together with no additional software or hardware to buy.**

Connection of multiple locations may require additional setup and internet connectivity, call to discuss.

Nexus employs all of the above and even more features than listed. If you would like to get a first hand glimpse at what Nexus can offer your business, you may call us 24 hours a day at (813) 333-112, or alternatively, you may e-mail us at

Nexus@aeonblue.com

Real-World Application Process & Work Flow: A paperless transaction.

The process above explains in detail and simplicity how easy and fool-proof the proven Nexus system is. The software eliminates the need for paper tickets being carried by customers, which prevents tampering and/or fraudulent receipts. Nexus can work wirelessly between systems and all data is instantly available from any system at the scrap yard or facility.

Application Screenshots:

This is the touch-screen application, Nexus TSi, displaying a list of Products in the Copper category. Product categories allow ultra-fast searching of products and speeds up efficiency during ticket entry.

Application Screenshots:

The screenshot displays the Nexus TSi software interface. At the top, it shows the version 'Nexus TSi - v2.1.3.5' and the user 'admin@AEON Blue Software:'. The main interface is divided into several sections:

- Customer Information:** Displays the name 'Alex Murphy' and address '548 Primrose Ln., Detroit, Michigan 48033'. It includes a search field for customer names.
- Ticket Set Details:** Shows 'Ticket Set No. 0033' and a table of tickets. The table has columns for Ticket, Product ID, Net Wgt., Price, and Ext. One ticket is listed: Ticket 0083, Product ID Copper #1, Net Wgt. 115, Price \$3.20..., and Ext. \$368.00.
- Manual Weight Entry Keypad:** A numeric keypad for entering weights. It shows 'Gross Weight' as 0. A note indicates '< 14,430 lbs' and '< Not Connected'.
- Material Identification Window:** Displays a photo of 'Misc. Iron / Shredder Feed' with a warning: 'No batteries or combustibles allowed. Gas tanks and paint thinner containers must be crushed and emptied. Can be mixed with non-ferrous items. Examples are car parts, engines, bicycles washers and dryers, roofing tin and stoves.'
- Payment and Action Buttons:** Includes buttons for 'New Ticket Set', 'Add Ticket', 'Delete Ticket', 'Print Tickets', 'Pay Cash', 'Pay Check', and 'Pay with PayPal'. At the bottom, there are 'Save' and 'Cancel' buttons.

This is the touch-screen program, Nexus TSi displaying the manual weight entry keypad during ticket creation as well as being connected to the inbound (gross) scale. Weights are populated automatically by the scale (if connected), but users may also override the weights and manually make adjustments and weight entries (with permission).

Tickets can be created, edited and deleted from any terminal. The touch screen software is built on the same platform as the office software, so drivers licenses, fingerprints, signatures and payments can be made from touch screens.

In most cases, a customer can walk directly up to a touch screen, hand their license to the operator, and it is then swiped at the terminal. During that swipe, Nexus checks to see if the customer already exists in the system. If the customer exists, they are pulled up on screen, along with any open tickets they have. A picture of the customer appears in the upper left hand of the screen next to their name. Their most recent drivers license, signature, and fingerprint will show at the bottom of the screen, guaranteeing identification of the customer. If the customer does not exist in the system, their information is instantly populated with that swipe, and the customer's account is established, eliminating manual entry.

One of Nexus' most unique features, is that it shows a material identification window during ticket creation, that shows the user a sample image of the material they have selected, as well as a description of how to identify the material. This aids scale personnel in learning the materials and prevents them from making costly mistakes.

Ticket Set No. 0065

Price	UM	Ext
\$3.20	LB	\$857.60
\$21.00	HW	\$1,180.83
\$10.00	HW	\$363.80
\$0.65	LB	\$7.80

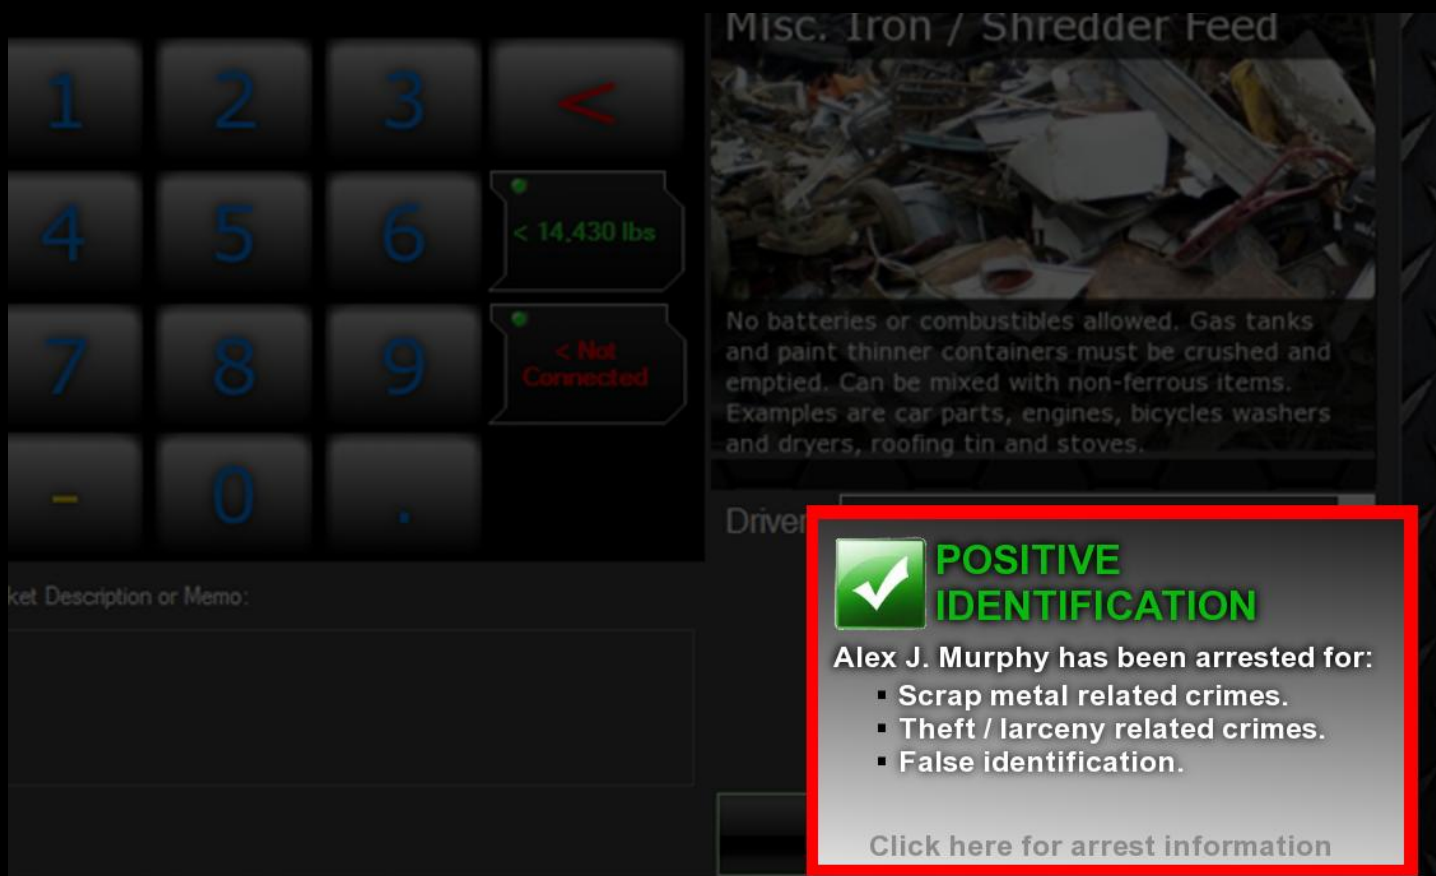

Buttons: Add Ticket, Edit Ticket, Delete, Pay Check, Pay with PayPal

Bottom bar: Capture All, View Signature, View License, View, NO PHOTO AVAILABLE icons

You can set each camera in your company to take a picture or record a video when a specific action occurs from within Nexus. For instance, when someone weighs full or empty, the system can take a picture of the scale. When someone is out in the yard, the system can record a video of them unloading the materials. When a scale ticket is paid by cash, record video of the employee handling the cash, or take a picture of the customer.

This advanced camera system allows you to keep a close watch on the happenings of your organization. Nexus' user security restrictions allow you to hide the camera images and video from your scale house personnel, so they will not be able to manipulate the camera system (e.g., move cameras out of the scope of view in order to skim the cash drawer) and also in the event that hidden cameras are present.

Application Screenshots: Automatic Background Checks

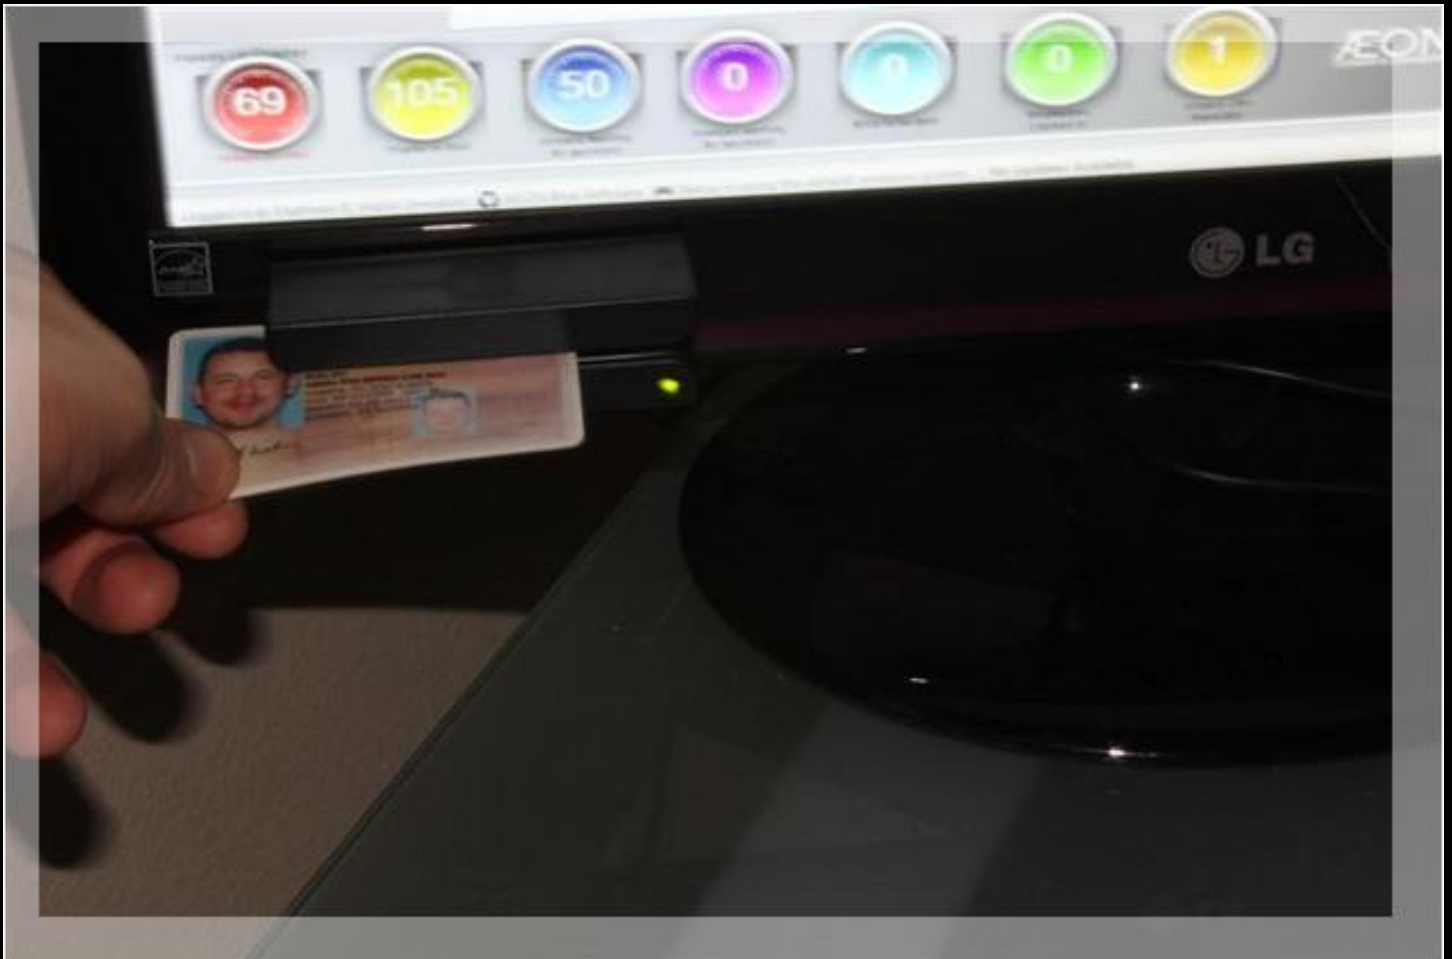

Nexus is the only scrap metal program which features automatic customer background checks.

When a customer comes in and they are pulled up within the system, Nexus will automatically launch a background check on the customer behind the scenes. A discrete icon will appear, tapping (or clicking) on the icon will display the window as shown above alerting the operator that the customer has been previously arrested as well as listing what the customer has been arrested for.

The software will notify the operator whether there is a “possible match” or a “positive identification” of that customer, and provide further details as to the background of the customer. This is especially helpful for states in which it is illegal to purchase scrap metal from someone who has been convicted of scrap metal theft. Customers can instantly be placed on your companies own personal do-not-buy list as well.

Best of all, this helpful feature is absolutely free for Nexus customers.

Application Screenshots: Drivers License Swiper

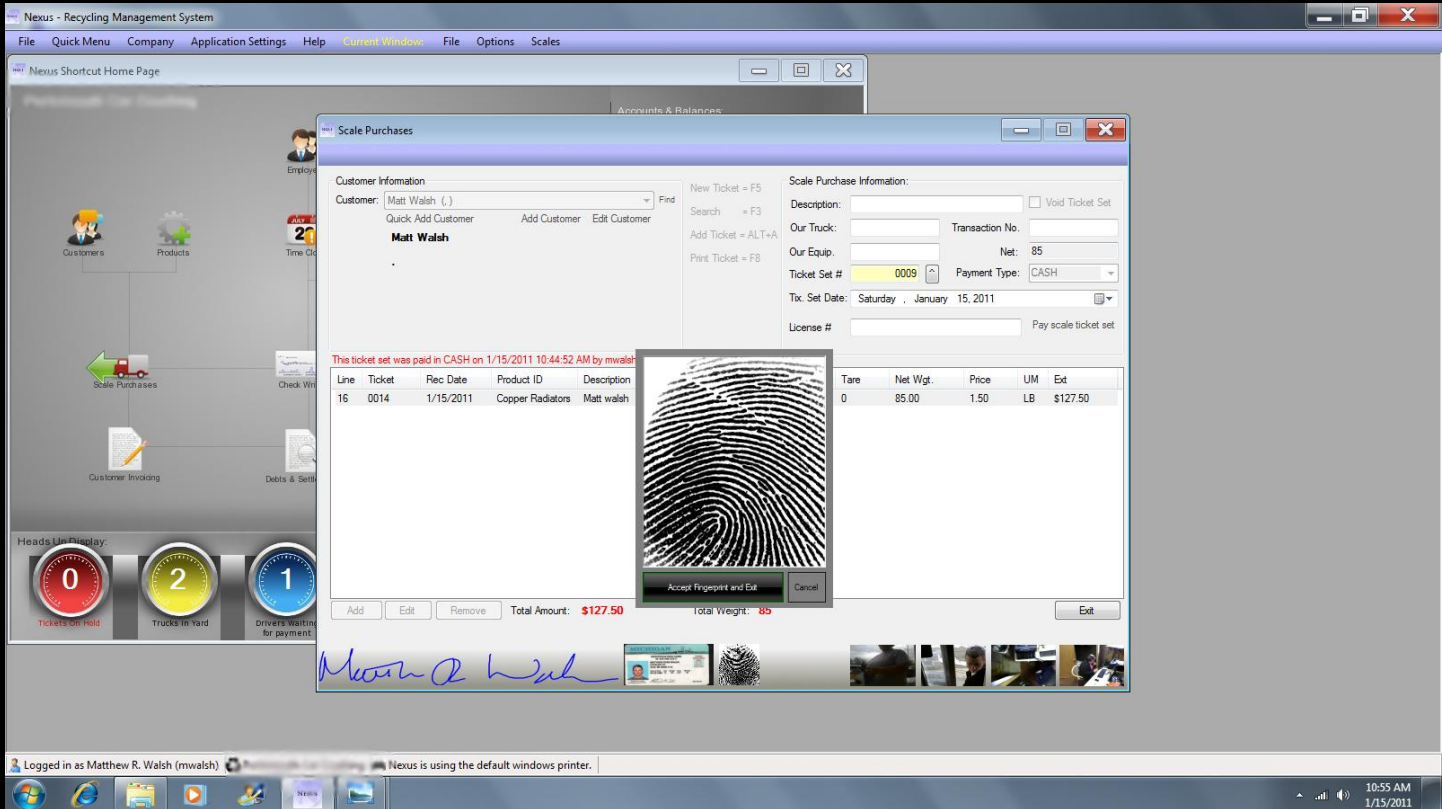

Nexus has drivers license swiper technology which reads the magnetic strip on the back of licenses. When a customer comes across a scale, or the payment window, simply swiping their ID will locate that customer in the system automatically, retrieve any open scale tickets that need to be paid, or even create the customer in the system if not present, automatically filling in name, address, city, state, zip, DOB, license number, even physical descriptions of the customer.

If the customer does not have their ID, credit cards and ATM cards may be used in place as a second form of ID. They will still work the exact same way, locating the customer within the system.

Nexus also supports advanced OCR technology, which actually “reads” the information off the license. However, OCR technology only works on some states due to highly embossed holographic logos now placed on modern licenses to prevent copying.

Application Screenshots: Fingerprint Capturing

(please note, version 1 of the Scale Ticketing system is shown, Version 2 is the current standard)

Nexus capturing a customers' fingerprint from an FBI certified fingerprint device. The fingerprints Nexus produces attach themselves to a scale ticket and the customer for easy access in the event law enforcement requests them. The fingerprint scanner offers your company an extra layer of security and may deter most peddlers from bringing in stolen or illegitimately obtained materials to your recycling center.

In addition to fingerprints, Nexus captures live signatures, camera images and video, and drivers licenses.

Automatic Website Management

Nexus can automatically update any website with current and accurate pricing information.

As soon as you change pricing in Nexus, the software will automatically update your company website. Your customers will be able to go onto your website and have access to current pricing, without needing to call.

This is a feature that can be invaluable for high-volume or centrally located facilities which service a large number of customers.
